Pupil premium strategy statement

This statement details our school's use of pupil premium funding to help improve the attainment of our disadvantaged pupils.

It outlines our pupil premium strategy, how we intend to spend the funding in this academic year and the effect that last year's spending of pupil premium had within our school.

School overview

Detail	Data
School name	Buile Hill Academy
Number of pupils in school	934
Proportion (%) of pupil premium eligible pupils	45.18%
Academic year/years that our current pupil premium strategy plan covers (3 year plans are recommended)	3 years (21-24)
Date this statement was published	December 2022 (Year 2)
Date on which it will be reviewed	September 2023 (Year 3)
Statement authorised by	David Lancaster
Pupil premium lead	Farihah Alam, Deputy Headteacher for the Quality of Education
Governor / Trustee lead	TBC

Funding overview

Detail	Amount
Pupil premium funding allocation this academic year	£360,018
Recovery premium funding allocation this academic year	£101,430
Pupil premium funding carried forward from previous years (enter £0 if not applicable)	£0
Total budget for this academic year	£461,448
If your school is an academy in a trust that pools this funding, state the amount available to your school this academic year	

Part A: Pupil premium strategy plan

Statement of intent

At Buile Hill Academy, we recognise that the Pupil Premium grant allows us as a school to set a focus on supporting our most vulnerable students, to narrow the gaps in student attainment and progress to maximise their chances of future success.

The funding received for students' eligible for pupil premium is allocated to interventions that are research informed and evidence led, using the Education Endowment Foundation's Guide to Pupil Premium and its Toolkit for Schools to ensure that all funds are deployed in the most effective manner.

As a school, we adopt a tiered approach to Pupil Premium spending that can be grouped into three broad categories:

Teaching – We spend a portion of the funding on improving teaching. This is to ensure that an effective teacher is in front of every class and that every teacher is supported in improving their practice that will lead to excellent outcomes for students.

Targeted academic support – We spend a portion of the funding on targeted academic support, identifying students who are not making good progress across the spectrum of achievement.

Wider Strategies – we spend a portion of the funding on strategies that relate to the most significant non-academic barriers to success in school: attendance, behaviour, and social and emotional support. This is in response to the needs of the students within our local community.

By adopting this tiered approach, we can focus on strategies that are likely to make the biggest difference.

Challenges

This details the key challenges to achievement that we have identified among our disadvantaged pupils.

Challenge number	Detail of challenge
1	Annual testing in Key Stage 3 for all students shows that PP students have lower reading age and CATs scores, suggesting further cognitive barriers to learning in the classroom. For the Year 7 cohort in 2021 there was a reading age gap of –20.6 months and in 2022 it was –11.1months. For CAT scores the Year 7 cohort in 2021 there was a mean difference of –2.4 and in 2022 –2.5 between PP and non-PP.
2	PP students have more limited access to learning resources at home and so are limited in how they can continue learning outside of the classroom. Based on a survey sent out in 2021 regarding access to technology at home, there was a higher percentage of PP students who did not have access to the internet or a device to complete work on.
3	PP students are more frequently excluded due to poor behaviour. This limits their engagement in school and presents barriers to their learning and progress. The FTE exclusions for PP students in Autumn term 2021 was 223 compared to non-PP students being 109. Also, when analysing the day-to-day behaviour points it is evident that a higher percentage of PP students have a significant number of negative points compared to non-PP students.
4	PP students have lower attendance to school than their non-PP peers. This has a direct impact on their engagement in learning and progress overall. PP attendance for PP students in Autumn term 20225 was 82.99% compared to non- PP at 87.97%.
5	PP students present more concerns in terms of their overall wellbeing and personal development, which affects their engagement in school and their learning.
6	PP students are exposed to significant challenges and negative influences driven by poverty and deprivation, which the school tackles each day. Salford is the 18th most deprived authority in the UK out of (317). The area in which the school is situated has areas which are within 1% of the most deprived in England. The number of violent crimes in the area of the school (2022) was the highest in the authority.

Intended outcomes

This explains the outcomes we are aiming for **by the end of our current strategy plan**, and how we will measure whether they have been achieved.

Intended outcome	Success criteria	Responsible	Challenge and Review
outcomes in English and Maths in all year groups	Narrowed gaps between PP and non-PP students by increasing the percentages of achievement by all students: English and Maths 4+ by 6% English and Maths 5+ by 6% Quality of students' work and formative assessment to demonstrate the progress that students make. This will be monitored through Subject Development reviews and Subject development action plan reviews. On average, students resources that engage them in a wide range of literature and further reading. who participate in oral language interventions make approximately five months' additional progress over the course of the year. https://educationendowmentfoundation.org.uk/edu cation-evidence/teaching-learning-toolkit/orallanguage-interventions 1,2,3,4,5 and 6 Improve teachers' subject knowledge The EEF toolkit states prioritising high quality so that all teachers are able to deliver teaching is essential to narrowing gaps and a curriculum with academic rigour and securing good outcomes. By ensuring that all sequence learning so that students teachers have access to the most up to date are ready for their next steps in their research and pedagogy specific to their disciplines education. is an essential part of delivering high quality Provide all teachers with membership teaching. to their relevant subject's professional association so that they can engage https://educationendowmentfoundation.org.uk/sup port-for-schools/school-planning-support/1-highwith ongoing CPD that is specific to their subject quality-teaching

Increase teachers' access to high quality learning resources and CPD to ensure that teaching is of high quality. Utilise subject-specific training for all subjects that is rooted in research on subject specific pedagogy. This includes curriculum design, questioning, assessment and feedback.		1,2,3,4,5 and 6
provision for ECTs and trainees that focuses on developing teaching practice. Build an NQT support programme that focuses on key areas of pedagogy that will have the most impact on student outcome: feedback, planning for progression and effective	Increasing leadership capacity to train and develop early career teachers is essential to delivering high quality teaching. In September 2020, the school employed 5 newly qualified teachers. By providing bespoke and targeted support for these teachers, they are able to develop their classroom practice and deliver high quality provision for students. The EEF state that supporting high quality teaching is a pivotal in improving children's outcomes. The research tells us that high quality teaching can narrow the disadvantage gap. There is a growing consensus that promoting effective professional development plays a crucial role improving classroom practice and outcomes. The introduction of the recent Early Career Framework has ensured that newly qualified teachers have access to a robust and effective professional development offer.	1,2,3,4,5 and 6

Targeted academic support (for example, tutoring, one-to-one support structured interventions)

Budgeted cost: £ 200,062

Activity	Evidence that supports this approach	Challenge number(s) addressed
Improved behaviour for learning and engagement for pupil premium students. This will be evident through improvements in behaviour data and reduction in exclusions. Employ a Deputy Headteacher for Pastoral and Assistant Headteacher for Pastoral who sets the school strategy on behaviour and pastoral support so that all staff have a consistent approach in managing and minimising poor behaviour in the school. Deploy Heads of Year to focus on targeted interventions for PP students who are at disengaging from school. E.g. social skills focus groups, one to one mentoring, family liaison work	The EEF toolkit states that social and emotional learning interventions have an identifiable and valuable impact on attitudes to learning and social relationships in school. They also have an average overall impact of four months' additional progress on attainment. https://educationendowmentfoundation.org.uk/education-evidence/teaching-learning-toolkit/social-and-emotional-learning	3, 4, 5, 6

Improve the literacy skills and reading ages of PP students to ensure that they are able to engage with the curriculum and develop a sustained interest in reading for pleasure.

Employ a librarian who can be deployed to offer targeted academic support to PP students who have lower reading ages than their chronological age.

Expand the library catalogue to offer a wider variety of titles for students to enjoy.

Reading comprehension strategies are identified as one of the highest impact strategies in the EEF toolkit. By expanding the school's library catalogue and through effective deployment of the school librarian to deliver focused small-group reading interventions, students in Key Stage 3 will be given support to improve their reading age to be in line with their chronological age.

Part B: Review of outcomes in the previous academic year

Pupil premium strategy outcomes

This details the impact that our pupil premium activity had on pupils in the 2022 to 2023 academic year. Due to uneven impact of the pandemic on 2021/22 school and college performance data it is recommended to not compare the data with previous years.

Externally validated 2023 outcomes at KS4 were, unfortunately, not strong for disadvantaged students. Whilst non-disadvantaged students gained a Progress 8 score of -0.83, the P8 score for disadvantaged students was -1.3. This is a gap of 0.47 grades. We recognise that this is unacceptable, and we are dedicated to ensuring this gap closes over the coming years.

We know that, just as national trends reflect, the impact of the Covid-19 pandemic is significantly larger for disadvantaged students. We have seen this in the learning losses for this group. Teachers and leaders in school have strived to close these learning losses and have re-designed their curricula to try to repair learning gaps. This has been noted in our internal MER processes throughout the year, where heads of department in particular have been able to articulate how their teams have endeavoured to support students. Our overall attendance in 2021-2022 was also lower than hoped. Whilst some of this is attributed to continued challenges with Covid-19 illness, we recognise that there is still significant work to be done to improve attendance, particularly for disadvantaged students. It is for this reason that the attendance strategy has been updated.

In other aspects of school life, interventions for disadvantaged students have had a more positive effect. For example, the early intervention of students with reading programmes has seen a majority of students on the programme making accelerated progress. In addition, despite the challenging year, data regarding student behaviour displayed a positive trajectory overall. For example, the number of fixed-term suspensions was significantly reduced towards the end of the year. In addition, the tightening of policies surrounding behaviour and expectations had impact in lessons, where MER processes showed an improvement in students' behaviour for learning and engagement in learning overall.
